REMARKS

The specification is amended herein to correct technical informalities. Specifically sequence identifiers (SEQ ID NO:) have been inserted in the Brief Description of the Drawings and within the text of the specification wherever nucleotide or amino acid sequences are recited. An abstract has been inserted on the last page of the specification and a copy of the abstract is submitted herewith on a separate sheet as Exhibit A. The proper claim to priority and continuing data have been inserted on page 1, line 2 of the specification. A declaration executed by all the inventors is submitted herewith and establishes the proper priority date of the instant application.

Claims 1-24 are pending. Claims 2, 13, and 18 are under active consideration due to the restriction requirement dated November 17, 1999. Claims 2, 13 and 18 are amended herein to merely correct technical informalities and typographical errors. A Request to Correct Inventorship under 37 C.F.R. § 1.48 and a Petition to Accept Unintentionally Delayed Claim for Priority under 37 C.F.R. § 1.78(a)(3) are being filed concurrently herewith under separate transmittal.

Claims 2, 13, and 18 stand rejected under 35 U.S.C. § 102(b) as being anticipated by Collins et al. (WO97/12032). This rejection is in error and should be withdrawn. The priority date of the instant application, as amended herein, is September 30, 1994 and thus predates the Collins reference of 1997. Thus, Collins et al. (WO97/12032) is not available as art to the instant application and the applicants respectfully submit that the rejection under 35 U.S.C. § 102(b) should be withdrawn.

Claims 2, 13, and 18 stand rejected under 35 U.S.C. § 102(b) as being anticipated by Collins et al., 1995, Proc. Natl. Acad. Sci. 92:11563. This rejection is in error and should be withdrawn. The priority date of the instant application, as amended herein, is September 30, 1994 and thus predates the Collins reference of 1995. Thus, Collins et al., 1995, Proc. Natl. Acad. Sci. 92:11563 is not available as art to the instant application and the applicants respectfully submit that the rejection under 35 U.S.C. § 102(b) should be withdrawn.

2. **The Rejection under 35 U.S.C. § 103 is obviated by the amendment made herein and should therefore be withdrawn**

Claim 18 stands rejected under 35 U.S.C. § 103(a) as being obvious in light of Collins et al., 1995, Proc. Natl. Acad. Sci. 92:11563. This rejection is in error and should be withdrawn. The priority date of the instant application, as amended herein, is September 30, 1994 and thus predates the Collins reference of 1995. Thus, Collins et al., 1995, Proc. Natl. Acad. Sci. 92:11563 is not available as art to the instant application and the applicants respectfully submit that the rejection under 35 U.S.C. § 103(a) should be withdrawn.

CONCLUSION

Applicants respectfully request entry and consideration of the foregoing amendments and remarks. No new matter has been introduced. The claims are believed to be free of the art and patentable. Withdrawal of all the rejections and an allowance are earnestly sought.
